Lab 9: Figma Tutorial Part 3

Instructions

In IDC3021C (the prerequisite course for this class), you learned how to use Figma and completed Parts 1 and 2 of the Figma for Beginners tutorial. For this project, you will continue with Part 3, Beginner 3: Build prototypes.

Be sure to set the link sharing setting to Anyone with the link can view.

Paste the link to your prototype and a screenshot showing the prototype in a Word document or PowerPoint Presentation. You don't have to wait for other people to comment and you don't need to incorporate feedback.

There is no Canvas submission for this project, you will submit your work to a GitHub repository as described below.

Submitting your work

There is no Canvas submission for this project, you will commit the Word document or PowerPoint presentation with the link to your prototype and a screenshot showing the prototype to the provided classroom repository.
